

July marked the anniversary of the Brampton, Bramfield and Ringsfield working together as one Association. The bond between the three schools was clearly demonstrated this term when the year 3/4 classes met up at Brampton for a joint day of activities. We were delighted to invite Zoolab who brought delivered a workshop on animals from the rainforest. Chris was incredibly knowledgeable and has visited rainforests all around the globe. He brought with him live rainforest animals including Tress frogs, snakes and Geckos which the children were able to touch and handle. In the afternoon all the children competed in a Quads Athletics event organised by Mrs Wharam. As the photos below show all the children were socialising and working together a fantastic day!

The sports leaders at Brampton have had great fun choosing outdoor gym equipment for all the children to use at break times. Part of the task involved them talking to the other children in school to find out what they would like in the outdoor gym and helping the office staff to place the order. The equipment chosen includes a rowing machine, exercise bike, cross trainer, an upper body strength exerciser and a walking machine. After having a go on each piece of equipment the sports leaders enjoyed teaching the rest of the school how to exercise safely. The children are really excited to be able to use the machines and are keen to set themselves challenges to help improve their strength and stamina.
