

News from Nacton Church of England Primary School

Summer Term 2019

On Friday 24th May we took part in a MAT wide Outdoor Maths Day. The children were all involved in a variety of activities; Andy Goldsworthy inspired art work, using everyday objects to work out areas and using Pythagoras theory to find the height of our Eucalyptus tree. We found that the children worked together well and they challenged themselves with a high a standard of mathematical enquiry.
