

Eyke C of E Primary School

Maths Through PE

Our Maths Week this term was fantastic fun for all!

In Foundation and Year 1 the children have been focusing on counting and recognising numbers. They used ladders laid on the floor and counted forwards and backwards as they jumped up and down the ladder – the hall looked like an enormous game of snakes and ladders! Some children counted from 1 to 10 and some from 10 to 20. Lots of children could count backwards as well as forwards and some even used larger numbers!

In Willow Class the children used a times tables relay to help prepare them for their Multiplication Check this summer.

And Elm Class have been studying the work of the choreographer, Merse Cunningham, who used probability and chance to create his dance masterpieces between 1950 and 2009. The children used randomly generated numbers, the school phone number and the results of calculations to create their own contemporary dances.
