

Eyke C of E Primary School

It has been a busy few months at Eyke and our vision and key drivers - Aspiration, Enrichment and Global Citizenship - are at the heart of all we try to do in school.

In our Year R and 1 class, Ash Class, the children have been reading "The Odd Egg" in their English lessons. The children have also been learning about Jewish Mitzvahs and exploring the school to ensure we are welcoming to visitors.

As always, our teachers having been working hard to bring learning to life: last week we were visited by Brafe Engineering who explained to the children how metal is heated to become molten and then cast in moulds. They demonstrated each step of the process (without setting fire to the school) and this week we received some very lovely school crests which they had produced with the children and then taken away to cool and to polish.

Every child at Eyke belongs to a committee which meets every three weeks. They have a really positive impact on life in the school and the local community. The Wellbeing Committee are working hard to support children in school and on the playground and often meet children on the Friendship Bench. The Eco Committee are very proud of their battery recycling work in the community which has now resulted in us being second on the national leader board for The Great Battery Hunt. And this week the Collective Worship Team presented an assembly about Perseverance to the whole school.
