

Spring 2024

We started the term learning about Epiphany and having an Epiphany parade.

Children in Year 3 have been learning about the Stone Age and really enjoyed a stone age experience day. A highlight of the day was cooking and tasting fish.

Each term, we have a TechWeCan event. This is an initiative that promotes STEM subjects as careers. This term the children have been learning about drones. Following on from an assembly and a visit from a drone the children designed a drone.

As part of their geography unit, children in Year 5 went to visit businesses in Woodbridge. They even had the opportunity to sample ice creams!

Love your neighbour as you love yourself
