

ART EXHIBITION

At St Mary's we have been celebrating our artistic skills by sharing our Art work in a whole school art exhibition.

This was also a good opportunity to share some work developed from our new Art curriculum, and share what a positive impact it has had.

Last half term every class focussed on 3D Art during their Art sessions. Each class looked at artists who create 3D work, experimented and explored their own 3D pieces. Finally every class produced a piece of 3D work for our school Art exhibition.

In Ash class the children made 3D animals after reading 'Greedy Zebra' by Mwenye Hadithi.

The children used wire as a base and covered in Modroc. Finally they painted their designs with brusho.

In year 1 the children completed a sculptural project. This begun with making drawings from observation, exploring media, and transforming the drawings from

2D to
3D to
make a
bird.

In years 2 and 3 we explored stick transformations.

As artists we used our creative skills to re-see and re-imagine the world.

We explored how we could transform a familiar object into new and fun form.

In year 6 we explored how traditional and contemporary artists use cut-outs for artistic affect. A

We adapted their techniques to make your own shadow puppets.
